

# THE DIGITAL FOUNDATION FOR THE NEW SPEED OF BUSINESS

**Excel in the digital age with abundant enterprise-grade internet and managed services at unbeatable low prices.**

The world has changed. Everything is online. Network performance, reliability, and security is mission critical as business moves out of the boardroom and into the cloud. Don't let networking limitations constrain your success and throttle employee productivity. Be a leader in tomorrow's markets today with a suite of communications and networking services that are designed for the new speed of doing business.

## WILINE INTERNET

Customize the bandwidth that is right for your business, choosing anything between 50 Mbps and 10 Gbps. All speeds are dedicated and symmetrical and scaling up as you grow is as easy as a phone call. WiLine's prices are affordable, offering unbeatable savings to your bottom line.

WiLine's SLA-guaranteed business internet service is delivered over a private, mesh network with redundancy and proactive monitoring. This advanced software defined network (SDN) enables WiLine to offer installs in days not weeks and deliver superior speed, reliability, and performance unlike any other provider. Support is available 24/7 so WiLine is always there to address your needs.

### Guaranteed SLAs

- 100% Bandwidth
- 99.99% Availability
- < 10 ms Latency
- < 2 ms Jitter
- < 0.001% Packet Loss

## WILINE SD-WAN FROM VMWARE

Improve performance, agility, and revenue growth all while reducing costs, with SD-WAN. Move away from expensive legacy MPLS links and simplify branch WAN networking by automating deployment and improving overall performance. By supporting your need to access cloud-based enterprise applications, branch office enterprise appliances, and optional datacenter appliances, our SD-WAN solution provides agility and scale, as well as helping to simplify operations. Combine WiLine Business Internet with our SD-WAN solution for a rock-solid business continuity strategy.

## WILINE ADVANTAGES

**HIGH SPEED**

**AFFORDABLE**

**SYMMETRICAL**

**SECURE**

**RELIABLE**

**SUN-POWERED BATTERY BACKUP**

**FAST INSTALL**

## WILINE CYBERSECURITY

Protect your business from relentless attacks with WiLine Cybersecurity. Our multifaceted solutions combine best-in-class technology from VMware, Fortinet, and Blue Hexagon for optimum protection. Automatic threat detection, remediation, and restoration to a pre-infected state with the push of a button gives you peace of mind without having to run your own expensive SOC.

## WILINE MANAGED WI-FI

Empower your business with the freedom to roam with WiLine's enterprise-grade access points. Private and guest Wi-Fi is secured with password access. Pick the deployment option that works best for your business, choosing between a wireless version that uses a mesh deployment model or a wired version that is connected to the LAN with PoE. Either option is fully managed by WiLine and includes administration, monitoring, and reporting.

## WILINE CLOUD VOICE SERVICE

Stay in touch for less while enjoying all the communication features you have come to expect in a business phone system. Service includes unlimited local/long distance calling plus low international rates. Your employees can take and make calls using a desk phone, computer, or mobile device. Keep your existing phone numbers or get new numbers from WiLine, it's your choice.

WiLine's comprehensive feature set covers all use cases including your main business number, individual employees, contact center agents, and specialty locations like conference rooms, lobbies, and warehouses. An easy-to-use online portal gives you the power to manage all the feature-rich settings available to maximize the business benefit. One affordable, monthly rate per user keeps your costs low and predictable.
